

## **The ONEGODONLINE social network with the original economic model on blockchain and the token Absolutme**

### **What problem solves?**

Monetization of users' time in the social network. Users receive cryptocurrency for socially significant actions within the network.

### **Stages of implementation**

1. In two years, the project team has created a completely ready-made social network with advanced features and an original economic model on the blockchain.
2. Q4. 2018. Bulletin board sales.
3. Q1. 2019. Messenger.
4. Q2. 2019. Crowdfunding and charity.
5. Q4. 2019. Gaming services

### **Advantages**

Users of the social network can easily earn without financial investments by simply communicating in the social network.

Completely ready to start project with advanced functionality of the network ensures the growth of the number of users.

The original economic model of the social network guarantees a constant growth in the value of the token, as it is provided with an ever-expanding range of goods and services.

Integration of any online services and applications. Integration of social capital into government and business structures.

The implementation of infrastructure projects.

### **Why is the token constantly growing in price guaranteed?**

For presale one token Absolutme will cost 10 USD. Every month its price will grow by 10 USD. Immediately after the end of the ICO and the launch of the advertising company, the primary cost of the token will be 100 USD. Guaranteed monthly increase in the cost of the token is not less than 10%.

The original model of the internal economy of the social network provides each token with an increasing number of internal coins of the project, for which users can purchase various goods and services.

The volume and range of goods and services of the social network is constantly increasing.

When registering and performing other socially significant actions, users create a total number of internal coins for which goods and services can be purchased.

User-generated internal coins accumulate over time in the ONEGODONLINE Fund. There the coins come from all user e-wallets over time, as 5% of each user's coins go to the Fund every month in the form of tax, or when users spend them on paid network services.

As a result, each token Absolutme of the social network, provided with an ever-increasing number of internal coins, and therefore goods and services. The token is constantly growing in price on the exchanges, as its internal security with a wide range of goods and services of the portal grows.

### **What will get the token holders?**

Each token holder receives a digital financial asset that is guaranteed to increase in price every month. Each token is provided with an increasing volume and range of different goods and services.

### **Token economy: demand and price growth**

Fully ready project with advanced network functionality, as well as the original model of the economy on the blockchain, allow users to earn without investments and provide rapid growth in the number of new users.

Every month the token Absolutme of the social network ONEGODONLINE is guaranteed to increase in price by at least 10%. Tokens are issued only once. Tokens are traded on exchanges immediately after the ICO.

### **Token sale**

Start: September 2018. Finish: May 2019. Price of the token within the limits of the token sale: 10 USD. ICO lasts for 9 months. Each month, the value of the token increases by 10 USD.

The token sale can be stopped at any time in case of reaching the necessary funds or because of changes in market conditions.

There is no provision for additional emission, as the economic strategy of the project provides for a constant and guaranteed increase in the value of all tokens available and issued once.

Soft cap: 10.000.000 USD

Hard cap: 1.000.000.000 USD

### **CEO**

Dmitry Belokonev
